EDUCATION

BACHELOR OF INFORMATION
SYSTEM
2024

SKILLS

- MERN stack development
- Version control (GIT)
- API Development and Integration
- Responsive design and Mobile-First development
- Database management
- Project management

Zabihullah Hasanzadah

MERN STACK DEVELOPER

As a skilled MERN stack developer, I specialize in building full-stack web applications with a focus on efficiency, scalability, and clean code. From designing intuitive frontends using React to creating robust backends with Node.js and Express.js, and MongoDB, I strive to deliver seamless digital experiences that meet modern web standards.

EXPERIENCE

REACT FRONTEND DEVELOPER & PROJECT MANAGER – LIBRARY SYSTEM, KABUL POLYTECHNIC UNIVERSITY Sept 2024

As the React frontend developer and project manager, I led a team to design and develop a comprehensive system and website for the Kabul Polytechnic University library. The platform allows students and teachers to browse available books, reserve hard copies, and download PDFs, streamlining the library's operations and improving user experience through an intuitive interface and efficient functionalities.

MERN STACK DEVELOPMENT INTERN – MINISTRY OF TELECOMMUNICATIONS AND INFORMATION TECHNOLOGY May 2024 – July 2024

I completed a three-month internship at the Ministry of Telecommunications and Information technology, where I worked on various MERN stack development projects. During this time, I gained hands-on experience in building and optimizing web applications, collaborating with teams, and applying my skills in MongoDB, Express, React, and Node.js to solve real-world problems in the telecommunications sector.
